

I am a second year Master's student in the biology department at UPEI. Having served as the Graduate Student Association representative to the Student Union for two years, I am confident that I can fully represent graduate students within the UPEI senate.

At present, I am serving my second year as an executive member of the UPEI GSA. Being involved in this organization has given me multiple contacts with all graduate faculties, including the MBA program, the master's in Island Studies program, the science faculty, the AVC, and the education department. If graduate students have issues which need to be addressed within the senate, I believe I can effectively advocate their concerns.

Having seen no representation of graduate students on the UPEI senate for the previous few years, the GSA discussed with the Student Union the possibility of reserving one of the Student Union seats for a graduate student. Having accomplished that goal, I am now pleased to be running for this newly available position.

On March 23rd-24th, vote yes for Bob Deziel for the graduate student senate seat!
