

I want to help provide the students of UPEI with a student union that is inclusive, abundant in opportunities for fun and expression, reliable, and most of all- cohesive. The student body deserves a union executive that always has the students' best interest at heart, one that strives to complete goals that are beneficial to the both the students' academic and social lives. I hope to achieve this level of student satisfaction by working with a team of well-founded, genuine student people who have the same set of ideals. My support of the candidates that I feel will get the job done in the executive will be vocal and emphasized. We have a chance to spread the focus of the student union's priorities from being just about the Wave, to every facet of student life. The position of VP Activities is one that has been utilized in order to further the Wave's success over the years. While the Wave will continue to be a significant part of my focus as VP Activities, I wish to provide opportunities for campus community events and socializing on a more frequent basis, not just Saturday nights. Get on board and show your support!
