

Hello all,

For those of you that don't know me my name's Jeff MacDougald. I am a second year biology student and I hope to represent the faculty of science once again on the student council this year. Why vote for me you ask? One might answer "why not?" However, there are more convincing reasons like...

- I have two years experience on the student council; one as the first year representative and one as a science representative.

- I regularly participate in the discussions that occur at council meetings and always strive to protect the interests of my constituents.

-I am also the second year representative of the biology society executive which keeps me even more in the loop of what's going on in the faculty of science.

- I GET THINGS DONE. I was the one that came up with the idea for lockers in the library hallway and brought it to the administration. There are now lockers in the library hallway.

I'll end in saying this: If elected to the position of Science Representative on the student council of the UPEISU, I will do my very best to act in the interests of my constituents, to fulfill my duties as a councillor, and to provide students with a great university experience.
