

For The Wave, I think that we need to diversify the acts we're getting in. While there was a mix this year, there was also a distinct lack of live music that I think needs to be fixed. This does not mean an end to DJs; I think that DJs are a huge part of what The Wave is, and what it should continue to be.

Another part of what the VP activities does is work with societies. I feel that there's a huge gap between what the societies are doing, and what the SU is doing. I think that the SU needs to work with societies to help increase the number and quality of events on campus.

As for myself; I'm in my second year here, doing a BBA with a minor in French. I served on the Student Council this past year as the Business Rep, and on the Business Society as the Second Year Rep. I also play in two bands.

If elected, I plan to work on the things I mentioned above, as well as a number of others, like looking at the possibility of putting in a "Wave Membership" card similar to what is used at other Maritime Universities.
