

Rob Livingstone for President:

I am a 3rd year chemistry major, from Stratford PEI. Over my time here at UPEI I have tried to do everything that has interested me at least once. Whether it was fundraising for Shinerama, representing students on the student council, or cheering on the Panthers as a member of the Cage Crew, I took a shot at it. It was through this process I came to love UPEI. I have been lucky enough to receive so much from this school, and I believe that the same potential exists for every UPEI student. If elected, my main goal will be to offer each student at UPEI every opportunity this school has provided to me. What I mean by this is that every student will receive an excellent and affordable education. Every student will be offered the chance to get involved in something they are passionate about. Most importantly, through these opportunities every student will be able to make great friendships, create life long memories, and feel like they belong to something simply by taking part in every day campus life. I have taken the time to observe this university and devise viable solutions to areas that I believe UPEI can improve upon. Thank you for your time, and please vote.

Rob.
