

I am in my second year of graduate studies after completing four years of undergrad at UPEI in Science. My primary goal as Senate Rep. will be to ensure that issues of all students are brought to the attention of the Student Union and are dealt with in a timely manner. I will also strive to create opportunities for this university to build a stronger campus community, and a feeling of spirit and pride not only in our University but in our amazing sports teams, associations, clubs and residence life! Go Panthers!
